

Rear Window Reflector Catalog

Each BL&S Rear Window[®] reflector consists of an acrylic panel specially tinted to enhance viewing of the Rear Window text display board. This panel is mounted to a flexible gooseneck for simple one-hand user adjustment. The hardware and parts are non-reflective black. The part number suffixes indicate which gooseneck is desired.

RWST-19/RWST-13

The most common reflector model, this unit consists of a tapered puck measuring 3.68" across the top, 3.5" across the bottom, and 1.5" high. The gooseneck is 19" or 13" long.

RW02-19/RW02-13

The puck with this unit is slightly smaller than the standard version. It measures 3.5" across the top, 2.5" across the bottom, and 2.25" high. The gooseneck 19" or 13" long.

RWCL-19/RWCL13

For theatres without cupholders or that prefer to keep the cupholders free, an armrest clamp can be attached for mounting to the chair's frame or a non-padded armrest instead of a puck. The clamp is adjustable from 1.8" – 3." The gooseneck is 19" or 13" long.

RWFS-19/RWFS-13

In situations where the pucks or clamp will not mount to the chair or where customers are in wheelchairs, the floor standing reflector may be the best choice. The height from floor to the start of the gooseneck can easily be adjusted from 34.5" to 63." The gooseneck can be 19" or 13" long.
